

What will happen if the vote does not pass?

Funds required for addressing major systems that have reached their end of life would exceed district capacity without sacrificing the maintenance needs at the other schools.

With limited funds available the district would have to look to other areas to pay for the upgrading systems that have reached their end of useful life at the high school such as:

Transportation
\$45,896 per route
29 routes

Elective Programs
\$100,000 per program
K-12

Activities
\$11,306 per activity
125 different activities

**Increase
Miscellaneous Mills**
(Board Approval Only)

VOTE
